

ECONOMICAL & ECO FRIENDLY

WOOD BY-PRODUCTS

Yoder Lumber
Sawmills & Kilns

Sawdust: *(Green or Dry Available)*

Green sawdust is screened to remove larger pieces.

Dry sawdust is generated from planers, molders, sanders, and grinding or larger blocks. All material is 8% moisture.

Uses:

- Ideal solution for animal bedding.
- Efficient boiler fuel.
- Extremely absorbent, exceptional for liquid spill cleanup or mud control.
- Well suited for fiber and wood board production.
- Great for mixing with compost or potting mix.
- Helps curtail erosion and makes a soft walkway.
- Excellent for use as a Firestarter (dry dust only).

Wood Chips: *3/4" x 1" x 1/4"*

Screened for consistent size and to remove outliers. Natural wood colors will gray with age. Heavy and durable allows chips to last for years.

Uses:

- Boiler fuel for hot water or steam generation
- Playground area cover
- Decorative pathways
- Agricultural cultivation
- Ground cover for animals

Bark Mulch: *(Fresh or Aged Available)*

Product is double ground through a Williams hammer mill to guarantee a consistent sized product. Natural product with no chemicals or dyes added. Mulch helps retain moisture in the soil, suppresses weeds, and keeps the garden looking more attractive.

Uses:

- Around trees, shrubs, and in garden beds
- Increases soil fertility
